Most Recent Customer Feedback

Replace roof aerial and install 2 additional room sockets

10 / 10

The old TV aerial finally packed up and was giving a poor signal on BBC channels. I was told the engineer would arrive between 09.00-09.30 and he rang the doorbell at 09.05 which is pretty good service :-). It was a foul day with strong winds and heavy rain but he went onto the roof without any fuss. I was advised of the cost before the work was started and the final charge was exactly the same. There was no mess left and the signal I get now is perfect. I cannot fault Apollo and would highly recommend them. **Customer in Tadley, 18 April 2012**

Provide extra aerial points to kitchen and bedrooms.

10 / 10

Competitive on price. Couldn't fault quality of workmanship. First class job. **Customer in Reading, 28 March 2012**

Remove very old aerial, replace with new digital aerial

10 / 10

I contacted Kenton to remove a very larger aerial system almost 30 years old and to replace it with a new digital aerial. He came when arranged for the initial inspection and quote. He was on time for the required work, but had to re-arrange as the nature of removal meant they needed a jib to access the very old system safely. He was again on time on the new day, through out the work he and his assistant were always very courteous and ensured that when any drilling took place suitable protection was taken to prevent dust from going everywhere. A very good job, well pleased, highly recommended. **Customer in Basingstoke, 27 March 2012**

Trouble shooting TV reception following digital switchover

10 / 10

After initially thinking we would need a new TV ariel, Kenton took the time to locate the problem which was preventing my TVs from working following the digittal switchover. Well worth the cost of the call out. **Customer in Thatcham, 2 March 2012**

Erected TV aerial on chimney ready for changeover.

10 / 10

Excellent and very helpful with logistics. **Customer in Basingstoke, 15 February 2012**
