Garden walls, paving, fencing and steps

10 / 10

Bridge Construction have just finished the second phase of a major re-modeling of our garden, having done the first phase in late 2009. Both lots of work were carried out to a high standard and at a reasonable cost and I have no hesitation in recommending this firm. The work needed was quite varied - building two substantial retaining walls, block and slab patios and paths, close-boarded fencing, concrete steps and a lot of muck shifting. All the different tasks were carried out knowledgeable and efficiently and at all times the men were careful, courteous and tidy. They were also very good in taking on at reasonable extra cost variations and additions to the original plans which I wanted to make as the job progressed. **Customer in Midhurst, 29 April 2011**
