Most Recent Customer Feedback

Boiler repair and service

10 / 10

Paul was able to come at short notice. An earlier job had over run, but Paul kept me updated and came well after normal working hours to uphold his promise when others would have rescheduled. He was helpful and kept me well informed of the problems. Wouldn't hesitate to recommend him or use him again. **Customer in Brighton, 27 March 2012**

Fixing boiler

10 / 10

Paul was helpful and efficient from beginning to end. He kept me informed of the problems, the solutions and tried to get the best cost effective option for me. I would most definitely use him again should I have another problem and wouldn't hesitate to recommend him! **Customer in Brighton, 17 January 2012**

Diagnosed fault and replaced cylinder thermostat

10 / 10

Paul was able to visit at short notice after another firm let us down. Arrived promptly and quickly diagnosed the fault with our heating. Replaced the thermostat on the hot water cylinder to get us warm, and recommended additional work (which I could already see needed doing - tank is leaking!!). No pressure to get this done, just a recommendation.

Would recommend and use again. **Customer in Brighton, 7 December 2011**

Replace old Combi Boiler

10 / 10

Paul (snr) did a great job with replacing our old combi boiler. He worked tirelessly for the whole day in order to complete the job on time along with his assistant Dean. The boiler is a Viessmann Vitodens 100-W and is a top efficiency rated combi-boiler. Paul's price was very competitive and he is very experienced so you feel you are in good hands, he takes time to answer any questions you may have and I would not hesitate to recommend him to anyone. The flat was left clean and tidy after the job. **Customer in Hove, 9 November 2011**

Removed old boiler and fitted new one.

10 / 10

I was very very happy with the service received from Paul and his assistant. He was extremely knowledgeable, polite and conscientious. Theirs was by far the lowest quote to remove and fit a new combi boiler for our maisonette and they worked without a break - did it a matter of hours and cleared everything up afterwards very well. We didn't know anything about them beforehand and it can be nerve wracking spending a lot of money with an untested company but I'm happy to say I'd definitely recommend them. And we now have a lovely looking boiler with hot water and heating working perfectly. Hurrah! **Customer in Hove, 31 October 2011**
