Most Recent Customer Feedback

Installation of 16 Solar PV Panels and all associated wiring

10 / 10

I rang Andy from Dorset Solar Power to request a quotation for Solar PV. He came round the very next evening to discuss the installation, even though he had been working all day, and explained all the facts about Solar PV and answered any questions I had. Andy is a really friendly, genuine guy and I had absolutely no hesitation in accepting his quotation. Andy kept me fully updated regarding stock availability and work commenced on the date advised. Andy and Wayne - another friendly and totally genuine guy, who is also a qualified electrician, were both totally reliable and worked very hard over two days in order to complete the job. I am so pleased with the entire installation, and would have no hesitation in recommending Dorset Solar Power to anyone, not just for Solar, but for anything electrical.
Customer in Bournemouth, 18 November 2011

Installation of solar panels

10 / 10

Andy and his crew are very professional and I am impressed with the quality of their work. Andy gives sound advice, without the hard sell that you get nowadays with a lot of companies. I would highly recommend them to anybody considering a solar panel installation.
Customer in Honiton, 17 November 2011

16 solar panels

10 / 10

We were very pleased with everything. In particular every effort was made to have the best installation output with the available roof layout. Full explanations were given when requested. We were kept informed of all progress. We look forward to the future!!
Customer in New Milton, 7 October 2011

Electrical installation of solar panels and inverter unit

10 / 10

Andy and Wayne could not have been more patient and helpful, working in far from ideal conditions in an older house with some cramped corners. They took great trouble to think through the way they could install the wiring with minimal

intrusion into existing decor. They stayed late (after 6.30 p.M.), patiently explaining the system purchased and left everything in good order. Highly recommended. **Customer in Southsea, 22 September 2011**

Installation of PV solar panel system

10 / 10

On time, on budget and very professional. The system is performing better than expected giving around 12.5 kWh per day on average so far (to 11 October) **Customer in Sturminster Newton, 20 September 2011**
