#### Build bay and install double glazing

10 / 10

First floor bay completely rebuilt to modern insulation and weather proofing standards, Double glazing installed to ground floor and first floor.

John Gleeson sorted years of damp due to original thirties construction aggravated by a rip off double glazier.

John brought his experience to the start with his investigations and quote, and ran the works including managing specialists well and cleanly. The finish was carefully matched to existing pebbledash and site left tidy.

We got good value, a good job and a good builder, who we'll use again.
