Repair to Solar Heating

10 / 10

The original supplier of our Solar Heating system (Smart Energy) went bust some time ago. The system was producing no hot water and there was an error message on the control unit. Chris came to look at it very quickly. He researched the system and diagnosed a fault in the control and a burnt out pump, phoned for the replacement pump (fortunately they are still available!) and it was delivered to our home the following day. He came and fitted it the next day (Saturday), flushed out the system, replaced the fuse in the control unit and gave everything a very thorough check over. The final bill was very reasonable. Very pleasant chap and he explained it all clearly. Definitely recommended! **Customer in Guildford, 6 August 2011**
