Most Recent Customer Feedback

Sound proofing of living room wall, painting and general carpentry 10 / 10

Great work - Daniel and team turned up on time, got the job done to a high standard and agreed price, cleaned up and were a pleasure to deal with. I have no hesitation in recommending Daniel to others. **Customer in London, 20 May 2012**

Soundproofing small bedroom ceiling 10 / 10

Work carried out very professionally and efficiently. Would thoroughly recommend the company. **Customer in Leighton Buzzard, 21 April 2012**

Installation of ceiling soundproofing and plastering in lounge and bathroom 10 / 10

I don't usually give 10 out of 10 but the Soundproofing R Us team score 10s in all categories. Daniel provided a competitive quote and the quality of the workmanship was excellent. Clean and tidy, reliable and a cheerful and friendly team. I would have no hesitation in recommending them. **Customer in Banwell, 16 April 2012**

Dab and Dot Property Updates (includes bathroom) 10 / 10

Update Dab and Dot Property Update

1. Stud Walls (living room, both bedrooms, up the stairs, bathroom)

I can still hear walking along the living room wall where I had the stud wall work done. It is occasional and distant. Next door has wooden floors, and I just have carpet without underlay. These sounds could be reduced further with underlay. I don't know if four layers of everything (sound board, barrier matting, or rock wool) would have made any difference. I don't know if the materials used for my home solution are the same as one would have used to soundproof a loud

factory. If this solution exists or existed, I would have chosen it. Overall I am happy that I cannot hear next door talking, TV light switches ect. I can put up with the occasional thud. 2. Ceiling in the living room

I had the living room ceiling done. I wanted the living room to be as quiet as possible; and became convinced that whenever next door play their 'music' it seeps into any parts of this house which have not been soundproofed. I no longer hear next door scraping something along their wooden floor. I don't hear music from next door, but they are not noisy anyway. 2. Bedrooms

Don't hear anything in the soundproofed bedrooms (had stud wall to the party walls, and M20 for the walls adjoining. Before I had the work done, I could hear coughing, light switches ect. I don't hear next doors bathroom noise in the second bedroom since I had the bathroom done. 3. Bathrooms

Had the bathroom done the other day. They installed a stud wall, and new sound board (one layer) and did not remove the old plaster board walls. They could not apply the stud wall all the way down the wall because there is a sewer pipe that runs along the edge of the wall where the bath was. The work made the bathroom a bit smaller than before. I don't mind the loss of space. Before I could hear talking and singing. I hear if they are banging on the wall? One would hear...

Soundproofing two alcoves in victorian house

10 / 10

Very satisfied with the works and it has reduced sound transference as anticipated. Consider it a good value solution and Daniel was really nice to deal with. **Customer in Brighton, 2 April 2012**
