Installation of a wireless intruder system 9.8 / 10

The movement sensors were positioned to do their purpose and do not intrude into the rooms. The control box has been positioned in a very suitable and unobtrusive place. We were given good advice and suggestions for the items that we could require. The work was carried out very professionally and quickly. The system has been working well (installed 5 weeks ago). **Customer in Hassocks, 19 April 2012**

Used initially in March 2011 to service our alarm and happy with service. Used a second time following alarm cable being cut by workmen.
