Two installations at two different addresses 10 / 10

Can't say enough positives about John on both occasions. Turned up at the time agreed, set out all my options for both Aerial and Satellite installations. Costed out the options with attention to keeping my costs down as low as possible. Efficient, clean and tidy with plenty of time allocated to explaining what has been done and how it works. Even set up the Freesat boxes that he didn't supply. Didn't charge me on a call out for realigning a dish that moved cause unknown. Will only use John now for all my work. **Customer in Christchurch, 1 February 2012**

Re connect aerial point in upstairs (loft)bedroom 10 / 10

Excellent work. An initial inspection showed that the previous installer had not set the aerial in the correct direction. A check of the aerial also revealed that the previous installer had broken one connection on the aerial and made a botch

repair. Mr Booth adjusted my aerial with the result that I no longer needed a signal booster, repaired the previous botched effort and re-connected the aerial to the point on the bedroom wall all for a very modest cash sum and within the space of an hour. **Customer in Lymington, 11 January 2012**
